 National Weather Service
MARINE WEATHER SERVICE CHART
 MORGAN CITY, LA TO BROWNSVILLE, TX
 NOT TO BE USED FOR NAVIGATION

LEGEND

- ⊙ NOAA WEATHER RADIO TRANSMITTER SITE
- ☐ SYMBOL INDICATES A WEATHER REPORT IS INCLUDED IN NOAA WEATHER RADIO (VHF-FM) BROADCAST WHEN AVAILABLE
- * WEATHER BUOY
- ▲ COASTAL-MARINE AUTOMATED NETWORK (C-MAN) STATION
- TEXAS AUTOMATED BUOY SYSTEM (TABS) STATION
- TEXAS COASTAL OCEAN OBSERVING NETWORK STATION
- ◻ LOUISIANA STATE UNIVERSITY (TCOON) STATION

NATIONAL WEATHER SERVICE TELEPHONE NUMBERS

Marine Weather Forecasts, Small Craft Advisories, Gale, Storm, and Hurricane Warnings, when issued, can be obtained by telephone as follows:

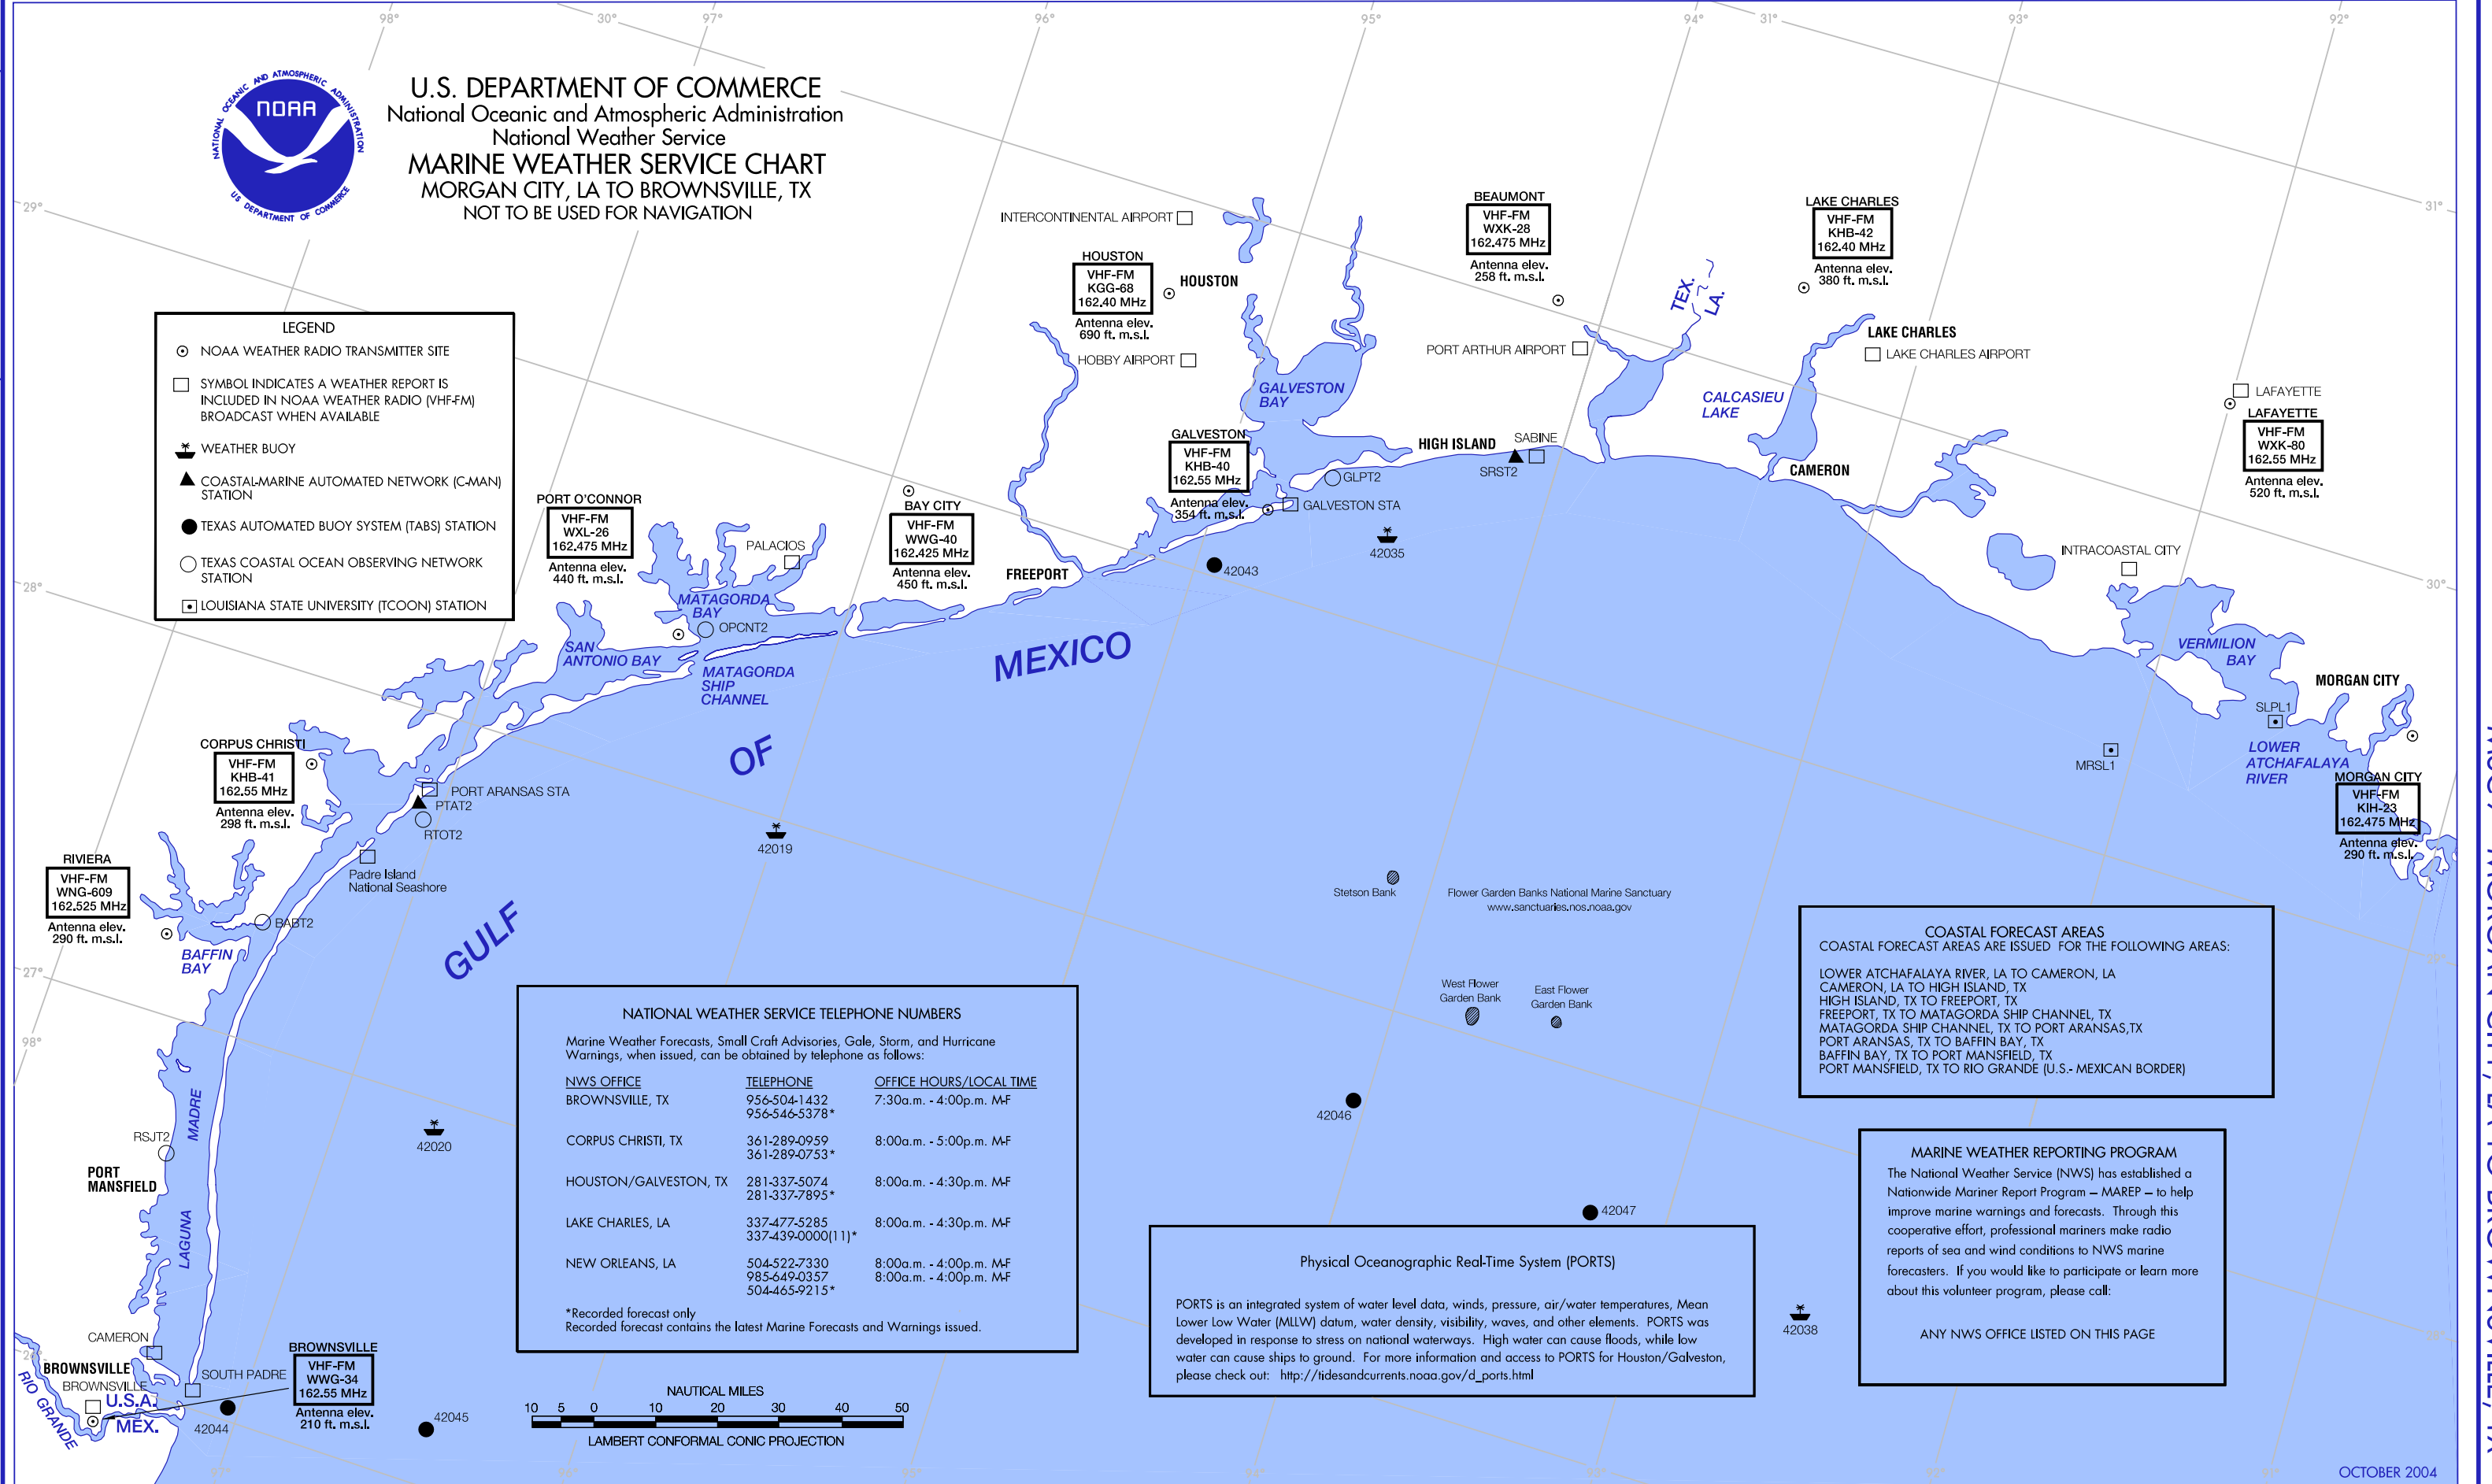

NWS OFFICE	TELEPHONE	OFFICE HOURS/LOCAL TIME
BROWNSVILLE, TX	956-504-1432 956-546-5378*	7:30a.m. - 4:00p.m. M-F
CORPUS CHRISTI, TX	361-289-0959 361-289-0753*	8:00a.m. - 5:00p.m. M-F
HOUSTON/GALVESTON, TX	281-337-5074 281-337-7895*	8:00a.m. - 4:30p.m. M-F
LAKE CHARLES, LA	337-477-5285 337-439-0000(11)*	8:00a.m. - 4:30p.m. M-F
NEW ORLEANS, LA	504-522-7330 985-649-0357 504-465-9215*	8:00a.m. - 4:00p.m. M-F 8:00a.m. - 4:00p.m. M-F

*Recorded forecast only
 Recorded forecast contains the latest Marine Forecasts and Warnings issued.

COASTAL FORECAST AREAS
 COASTAL FORECAST AREAS ARE ISSUED FOR THE FOLLOWING AREAS:
 LOWER ATCHAFALAYA RIVER, LA TO CAMERON, LA
 CAMERON, LA TO HIGH ISLAND, TX
 HIGH ISLAND, TX TO FREEPORT, TX
 FREEPORT, TX TO MATAGORDA SHIP CHANNEL, TX
 MATAGORDA SHIP CHANNEL, TX TO PORT ARANSAS, TX
 PORT ARANSAS, TX TO BAFFIN BAY, TX
 BAFFIN BAY, TX TO PORT MANSFIELD, TX
 PORT MANSFIELD, TX TO RIO GRANDE (U.S.- MEXICAN BORDER)

MARINE WEATHER REPORTING PROGRAM
 The National Weather Service (NWS) has established a Nationwide Mariner Report Program – MAREP – to help improve marine warnings and forecasts. Through this cooperative effort, professional mariners make radio reports of sea and wind conditions to NWS marine forecasters. If you would like to participate or learn more about this volunteer program, please call:
 ANY NWS OFFICE LISTED ON THIS PAGE

Physical Oceanographic Real-Time System (PORTS)
 PORTS is an integrated system of water level data, winds, pressure, air/water temperatures, Mean Lower Low Water (MLLW) datum, water density, visibility, waves, and other elements. PORTS was developed in response to stress on national waterways. High water can cause floods, while low water can cause ships to ground. For more information and access to PORTS for Houston/Galveston, please check out: http://tidesandcurrents.noaa.gov/d_ports.html

WEATHER RULES FOR SAFE BOATING

Before setting out:
 Obtain the latest available weather forecast for the boating area. The NOAA Weather Radio continuous broadcasts (VHF-FM) are the best way to keep informed of expected weather and sea conditions. If you hear on the radio that warnings are in effect, don't venture out on the water unless you are confident your boat can be navigated safely under forecast conditions of wind and sea.

While afloat:
 1. Keep a weather eye out for: the approach of dark, threatening clouds, which may foretell a squall or thunderstorm; any steady increase in wind or sea; any increase in wind velocity opposite in direction to a strong tidal current. A dangerous rip tide condition may form steep waves capable of broaching a boat.
 2. Check radio weather broadcasts for latest forecasts and warnings.
 3. Heavy static on your AM radio may be an indication of nearby thunderstorm activity.
 4. If a thunderstorm catches you while afloat, you should remember that not only gusty winds but also lightning poses a threat to safety.
 - stay below deck if possible.
 - keep away from metal objects that are not grounded to the boat's protection system.
 - don't touch more than one grounded object at the same time (or you may become a shortcut for electrical surges passing through the protection system).
 - put on a life jacket and prepare for rough sea conditions.

BROADCASTS OF MARINE WEATHER FORECASTS AND WARNINGS BY MARINE RADIOTELEPHONE STATIONS

City	Station	Frequency, kHz/MHz	Broadcast times (local) CST
Mobile, AL	NOQ (USCG)	~ CH 22A *# 2670 kHz	0420, 0620, 1020, 1620 0420, 0620, 1020, 1620
New Orleans, LA	NMG (USCG)	~ CH 22A *# 2670 kHz NAVTEX(G) 518 kHz	0435, 0635, 1035, 1635 0435, 0635, 1035, 1635, 2350 0100, 0500, 0900, 1300, 1700, 2100
Galveston, TX	NOY (USCG)	~ CH 22A *# 2670 kHz	0450, 0650, 1050, 1650 0450, 0650, 1050, 1650
Corpus Christi, TX	NOY-8 (USCG)	~ CH 22A *# 2670 kHz	0440, 0640, 1040, 1640 0440, 0640, 1040, 1640

USCG VHF broadcasts normally contain coastal forecasts.
 HF broadcasts normally contain offshore forecasts.
 Marine warnings are broadcast upon receipt.

- * Broadcast 1 hour later during Daylight Saving Time.
- ° Preceded by announcement on 2182 kHz
- ~ Preceded by announcement on ch. 16.
- # Single Sideband, suppressed carrier, carrier frequency.

OTHER MARINE WEATHER SERVICES CHARTS AVAILABLE

MSC-1	Eastport, ME to Montauk Point, NY	MSC-8	Mexican Border to Point Conception, CA
MSC-2	Montauk Point, NY to Manasquan, NJ	MSC-9	Point Conception, CA to Point St. George, CA
MSC-3	Manasquan, NJ to Cape Hatteras, NC	MSC-10	Point St. George, CA to Canadian Border
MSC-4	Cape Hatteras, NC to Savannah, GA	MSC-11/12	Great Lakes
MSC-5	Savannah, GA to Apalachicola, FL	MSC-13	Hawaiian Waters
MSC-6	Apalachicola, FL to Morgan City, LA	MSC-14	Puerto Rico and Virgin Islands
MSC-7	Morgan City, LA to Brownsville, TX	MSC-15	Alaskan Waters
		MSC-16	Guam and the Northern Mariana Islands

NOAA WEATHER RADIO BROADCASTS

CITY	STATION	FREQUENCY	BROADCAST TIMES
Bay City, TX	WWG-40	162.425 MHz	Continuously, 24 hrs a day
Beaumont, TX	WXK-28	162.475 MHz	Continuously, 24 hrs a day
Brownsville, TX	WWG-34	162.55 MHz	Continuously, 24 hrs a day
Corpus Christi, TX	KHB-41	162.55 MHz	Continuously, 24 hrs a day
Galveston, TX	KHB-40	162.55 MHz	Continuously, 24 hrs a day
Houston, TX	KGG-68	162.40 MHz	Continuously, 24 hrs a day
Lake Charles, LA	KHB-42	162.40 MHz	Continuously, 24 hrs a day
Lafayette, LA	WXK-80	162.55 MHz	Continuously, 24 hrs a day
Morgan City, LA	KIH-23	162.475 MHz	Continuously, 24 hrs a day
Port O'Connor, TX	WXL-26	162.475 MHz	Continuously, 24 hrs a day
Riviera, TX	WNG-609	162.525 MHz	Continuously, 24 hrs a day

These VHF-FM radio stations, locations shown on the map, are managed by the National Weather Service. Broadcasts are updated every 3 to 6 hours and amended as required. Broadcast contents vary, but in general contain the following types of information.
 1. Descriptions of the weather patterns affecting the southern part of the United States.
 2. Regional and state forecasts with outlook for the third day.
 3. Marine forecasts and warnings for coastal waters.
 4. Weather observations from selected National Weather Service and Coast Guard stations.
 5. Precipitation summaries and reports.
 6. Local weather observations and forecasts.
 7. Watches, warnings, statements and bulletins concerning adverse and severe weather.

RADIO WWW/WWWVH STORM INFORMATION BROADCASTS

HIGH SEAS STORM INFORMATION for the North Atlantic and North Pacific is provided mariners through a cooperative program of two Department of Commerce agencies: the National Weather Service of the National Oceanic and Atmospheric Administration and the National Institute of Standards and Technology. Bulletins are compiled by the National Weather Service and broadcast every hour by the National Institute of Standards and Technology's Frequency and Time Broadcast Services Radio Stations — WWW, Fort Collins, Colorado and WWWVH, Kauai, Hawaii. These are the radio stations that sailors and others listen to for daily time checks.

WWW (FORT COLLINS, CO)

FREQUENCIES : 2.5, 5, 10, 15, 20 MHz

The weather broadcast is in 45-second segments separated by a 15-second interval.

TIMES OF BROADCAST	BROADCAST AREA
8 minutes past the hour	Storm information for western North Atlantic,
9 minutes past the hour	including Gulf of Mexico and Caribbean Sea.

SAFETY RULES FOR SMALL BOAT OPERATORS

1. Never leave shore without an approved life preserver for each person aboard.
2. Check the weather before departure. Leave an itinerary of your trip with a responsible individual.
3. Equip your vessel with safety flares...know how to use them...replace outdated items.
4. Know the limitations of yourself, your crew, and your vessel.
5. If your vessel cannot reach a safe harbor prior to the arrival of severe weather...close all hatches, keep all unnecessary crew below and away from grounded metal objects. Sailing vessels should reduce sail immediately and be prepared to change course to head into possible strong outflow winds produced by thunderstorms.
6. Navigation is crucial particularly for the Gulf of Mexico where shoal waters, reefs, and obstructions abound. Research your trip thoroughly and prepare an approach route to your harbor.
7. Learn the rules of navigation...they may save your life. Never cross bows of large commercial vessels or barges.
8. It is often safer to remain offshore than to attempt to enter unfamiliar shallow waters or harbors at night or during periods of reduced visibility.

Radiifax charts for the Gulf of Mexico, Caribbean, Tropical Atlantic, and Tropical East Pacific are posted at:

<http://weather.noaa.gov/pub/fax/hfgulf.txt>

NOAA Weather Radio (NWR), Specific Area Message Encoder (SAME), and NWR Coverage

NOAA Weather Radio broadcasts on 162.40, 162.425, 162.45, 162.475, 162.50, 162.525 and 162.55 MHz can usually be received 20-40 miles from the transmitting antenna site, depending on terrain and the quality of the receiver used. Where transmitting antennas are on high ground, the range is somewhat greater, reaching 60 miles or more. The VHF-FM frequencies used for these broadcasts require narrow-band FM receivers. The National Weather Service recommends receivers having a sensitivity of one microvolt or less for a quieting factor of 20 decibels.

Some receivers are equipped with a warning alarm device that can be turned on by means of a tone signal controlled by the National Weather Service office concerned. This signal is transmitted for 13 seconds preceding an announcement of a severe weather warning.

In addition, the Federal Communications Commission (FCC) has approved the special SAME code to delineate marine areas. Mariners with NWR receivers equipped with SAME should check out:

<http://www.nws.noaa.gov/om/marine/wxradio.htm>
 for information on how to program their receivers.

For a listing of marine area and zone codes for SAME, go to:
<http://www.nws.noaa.gov/geodata/catalog/wsom/html/marinewreas.htm>

The NOAA Weather Radio coverage areas are estimates. For these maps, transmitter antenna performance are assumed to be omni-directional. As a result, actual coverage can be different from that depicted on this map. Coverage that is significantly different than depicted on this map should be reported to the local NWS forecast office.

EXPLANATION OF MARINE ADVISORIES/WARNINGS

SMALL CRAFT ADVISORY: Issued to alert mariners to sustained winds 20 to 33 knots and/or forecast seas 7 feet or greater that are/is expected for more than two hours.

GALE WARNING: A warning of sustained winds or frequent gusts in the range of 34 to 47 knots inclusive, either predicted or occurring, and not directly associated with a tropical cyclone.

STORM WARNING: A warning of sustained winds or frequent gusts in the range of 48 to 63 knots inclusive, either predicted or occurring, and not directly associated with a tropical cyclone.

HURRICANE FORCE WIND WARNING: A warning of sustained winds or frequent gusts of 64 knots or greater, either predicted or occurring, NOT associated with a tropical cyclone.

SPECIAL MARINE WARNING: Issued for severe local storms, for winds 34 knots or greater, and/or hail three-quarters inch in diameter or larger, and/or waterspouts.

TROPICAL STORM WARNING: Issued for a tropical cyclone in which the maximum sustained surface wind ranges from 34 to 63 knots inclusive.

HURRICANE WARNING: Issued for a tropical cyclone in which the maximum sustained surface wind is 64 knots or greater.

NOTE: A "TROPICAL STORM WATCH" or "HURRICANE WATCH" is issued whenever a tropical storm or hurricane becomes a threat to a coastal area. The "WATCH" is not a warning, but indicates that the tropical cyclone is near enough that persons in the area covered by the "WATCH" should listen to their radios for subsequent advisories and be ready to take precautionary action in case tropical storm or hurricane warnings are issued.

NATIONAL WEATHER SERVICE RADIOFAX AND TEXT FORECASTS AVAILABLE VIA E-MAIL (FTPMAIL)

National Weather Service radiifax charts and text forecasts are available via e-mail. The FTPMAIL server is intended to allow Internet access for mariners and other users who do not have direct access to the World Wide Web, but who are equipped with an e-mail system. Turnaround is generally under one hour, however, performance may vary widely and receipt cannot be guaranteed. To get started in using the NWS FTPMAIL service, follow these simple directions to the FTPMAIL "help" file (11 bytes).
